KOWR's participation in Mushroom Days (the Netherlands)

2019-05-30 12:51:04

The 35th edition of 'Mushroom Days', the most important trade show dedicated to champignons, took place in Hertogenbosch on 22-24 May 2019. The National Support Centre for Agriculture organized a national stand of 405 m² during the show.

Ten companies from Poland presented their offer on the stand:

- The Fillers Sp. z o.o. – producer of substrate loading and unloading machinery for the production of champignons,
- Lucky Grower Sp. z o.o. – complex equipment for cultivation areas,
- Hydrostor Sp. z o.o. – producer of hydrogels and production biostimulants,
- Reaserch Institute of Horticulture – governmental R&D center,
- Wokas S.A. – production of professional peat substrate for the production of champignons,
- Mexeo – disinfection technology and equipment generating gas chlorine dioxide, foil for manure loading, etc.,
- PWPO-T Promont Sp. z o.o. – products that maintain the climate of growth for champignons cultivated in cultivation rooms, storage equipment,
- Lab-EI Automatyka Andrzej Łobzowski – electronic measuring devices, measuring systems, systems for climate monitoring, etc.,
- Mega Sp. z o.o. – production lines for champignon processing and freezing,
- GL Group Spółdzielnia – distribution and sales of white and brown champignons.

Poland is the global leader in the export of champignons and its third largest producer worldwide. An innovative offer of Polish companies, gathered at the largest Polish national stand during the most important industry fair, enabled to foster this message among the visitors.

The main aim of the project was to present the Polish champignon growing system in a spectacular way, as an alternative to the Dutch system. As part of the joint national stand, Polish companies presented an entire cultivation system in a dedicated technology zone of ca. 160 m². The system included machines, protection products, growth stimulants and other innovative technological solutions.

Owing to the broad offer of participants, great localization and incredibly attractive construction, Polish national stand attracted attention of many foreign entrepreneurs. Information point located at the KOWR's national stand served as an additional source of information on Polish companies and Polish champignon industry.
